Latest projects

My portfolio
Next.js portfolio that presents my latest projects.

https://lucasbodev-portfolio.vercel.app/

Experience

2025 📍 Bastogne
Developer
La Taverne au Carré

Creation of a Next.js web application offering an interactive experience during the visit to the memory wall of La Taverne au Carré. Indeed, a wall filled with period portraits of a hundred veterans of the Second World War displays QR codes allowing to discover the story of each of these heroes.

2025 📍 Doncols
Developer
RHMedias

Creation of a showcase website for the company H2A – Engineer Architect & Associates. The company wanted to showcase its work online and manage the site using WordPress. My task was to integrate the design into WordPress using React.js and display the data retrieved from the WordPress database.

2023 📍 Liège
Intern developer
HEC Liège

During my final-year internship, I had the opportunity to develop from A to Z (from a mockup) an application for HEC Liège students. This application aims to allow students to create, consult and enrich activities (imported or created), by adding printouts, acquired skills and documents. They also have access to a workshop calendar to register for, a profile grouping their activities (exportable), as well as a graphical assessment of their acquired skills, also exportable.

Education

HelMo	ARBH
Application development Bachelor	CESS
2024	2017

Skills

Development

| React JS | • GSAP • Motion | Type script | Next JS | REST | Agile SCRUM |

Design

| Web Design | Mobile Design | User Experience | • Wireframing • Prototyping | Design System |
